

TORNADO Nozzle System

TORNADO Nozzle System for Waterborne Painting System

Waterborne Painting System requires increased airflow and turbulence to effectively dry the paint film. Our Tornado kit enhances this process by supplying additional filtered air from outside of the paint booth, significantly reducing the drying time.

Technical Specifications:

- Power Supply : Single Phase, 230 V, 50Hz
- Fitment Type : Horizontal
- Suction Units : 4 with individual filters
- No. of Nozzles : 28
- Additional Air Supply : ~6000 m³ / hour
- Control Panel : Digital Control Panel with Timer

Features

- Additional air from outside for drying
- Four suction units with filters
- Ergonomically Fitted & adjustable nozzles
- Built in timer function
- Compatible with any model paint booth

Additional Features

- Operates in Single Phase
- Suction unit fitment is customizable
(Add-on Kits available for constraint locations)

• High Lights
